

# CASE STUDY:

# GBP Accelerator

## Overview

### Multifamily Housing Class A Property in Seattle, WA

This Seattle community realized the quality of website traffic coming from Google and wanted to increase their presence in the search engine.

Seeking help from their digital marketing provider, the community turned to Google Business Profile Accelerator to improve their visibility for organic apartment search results.

Traffic arriving to the community website from Google Business Profile (GBP) converted at a high rate, supplying leads for the leasing team and boosting leasing velocity.

## Challenges

A low volume of website leads made it difficult for the leasing team to fill late-winter vacancies.

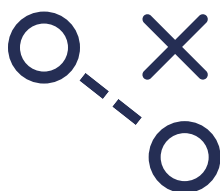

The community's Paid Search ads appeared in 76% of search results, but they struggled to capture organic search clicks.

The community had little organic search presence in Google, no GBP posts, and needed to build an organic strategy from the ground up.

### Main Challenge

Creating an Organic Search Presence

### Core Strategies

Google Business Profile Accelerator

### Key Outcome

47 Leads + 4 Leases  
From GBP in 1 Month

CONVERSION LOGIX®

# The Approach

The community sought the most effective solution to build an organic presence in Google. GBP became the leading solution as Conversion Logix used the platform to build organic presence for communities across the country.

Conversion Logix optimized the community's Google Business Profile and posted 8 monthly updates to the community GBP account. Posts promoted floor plan availability, community, and neighborhood highlights, as well as current offers.

Apartment seekers in Google viewed GBP posts, complete with images, descriptions, and calls to action. A scheduling link was added to the GBP profile, allowing prospects to directly click and schedule a tour with Schedule Genie®.
